

Office Action Response
U.S.S.N. 10/074,219
Page No. 2

IN THE SPECIFICATION:

Please amend Paragraph 2 on Page 10 as follows:

The basic construction is that of two concentric tubes: an inner tube (3) of inert material, usually glass, onto the end of which is attached the glass pH bulb (9) (4); and an outer tube (5) of inert material such as glass or plastic that houses the inner tube with a top seal (6) and bottom seal (7) that serve to maintain a concentric orientation of the inner and outer tubes (3) and (5) and create an reference electrolyte compartment (8) in the annulus.
